About Firemind

All-in AWS, born in the cloud partner. Firemind is a Generative Al and Data Modernisation specialist partner known for expertise in practical applications of generative Al, helping customers bring projects from prototype to full production, by providing end-to-end support.

Job Description

As a Senior Backend Engineer, you will be pivotal in building, deploying, and optimising cloud-based applications. You will leverage your deep knowledge of AWS services, as well as your skills in back-end development, to create comprehensive solutions. Your ability to deliver reliable, scalable, and efficient applications will be critical to our technology-driven offerings and customer satisfaction.

Responsibilities

- Application Development: Design, build, and maintain efficient, reusable, and reliable code for our cloud-based applications.
- AWS Management: Leverage AWS services to deploy, manage, and scale applications, ensuring optimal performance and security.
- Testing and Debugging: Test code to ensure robustness, usability, and general reliability; fix bugs and improve code quality as needed.
- Collaboration: Work with the team to manage the project lifecycle, from ideation to deployment and maintenance.
- Innovation: Stay abreast of emerging technologies or applications and the potential they could have on our business.

Skills & Experience

Essential

- Proven experience as a Backend Engineer, with a focus on AWS cloud services.
- Understanding of cloud-native architectures and DevOps principles.
- Excellent problem-solving skills, attention to detail, ability to work effectively in a collaborative team environment and a passion for learning and innovation.

Desirable

• AWS Certifications (e.g AWS Certified Developer, AWS Certified Solutions Architect)

What we offer

- Competitive salary and benefits package.
- The opportunity to work on cutting-edge technology projects with major clients.
- A supportive, collaborative, and innovative work environment.
- Continuous professional development opportunities.
- Flexibility in hybrid and remote working

How to apply

To apply, please submit your CV, cover letter, and any supporting documents. Applications will be considered on a rolling basis until the position is filled. We are an equal opportunity employer and value diversity at our company.
