About Firemind

Firemind is a Generative AI and Data Modernisation specialist partner known for expertise in practical applications of generative AI, founded on well-architected data platforms. Firemind provides consultancy, delivery and managed services, helping customers bring projects from prototype to full production, by providing end-to-end support.

Firemind are an acclaimed AWS Premier Partner. Our globally recognised expertise and continuous innovation in cloud computing have positioned us among the most highly accredited AWS partners worldwide. Dedicated to helping customers construct a modern data strategy and transforming businesses via efficient, reliable, and scalable AWS data driven solutions. We are expanding our global presence, offering flexibility in hybrid and remote working.

Job Description

We are seeking an experienced and knowledgeable AWS Senior Solutions Architect to join our team. The successful candidate will be responsible for designing and implementing robust, scalable, and efficient solutions on AWS for our clients, with a focus on data, analytics, machine learning and GenAI.

Responsibilities

- Work with clients to understand their business objectives and translate them into cloud-based technical solutions leveraging AWS technologies.
- Design, develop and optimise robust, scalable, secure, and performant AWS solutions.
- Lead the implementation of solutions, ensuring they are successfully delivered and meet clients' business objectives and security requirements.
- Collaborate with the sales team to design and propose deliverable solutions to meet client needs, considering budgetary and timescale constraints.
- Provide thought leadership on best practices for solution architecture, with an understanding of current technology trends in data,

Skills & Experience

Essential

- Proven experience as a Solutions Architect, with significant exposure to AWS environments.
- Deep technical knowledge of AWS services, focusing on data and analytics services (e.g., Redshift, Data Lake, Athena, Glue, Kinesis) and AI/machine learning services (predominantly SageMaker and Bedrock).
- Strong understanding of cloud architecture design and implementation, with an emphasis on AWS.
- Excellent customer-facing skills, with the ability to communicate effectively with stakeholders at all levels.
- Proficient documentation skills, including architecture design tools. Ability to create and maintain clear High-Level Designs and detailed design documentation.
- Strong problem-solving abilities and attention to detail.
- Commercial awareness to manage customer needs within agreed scope. Risk management in collaboration with Engagement Managers.
- Bachelor's degree or higher in Computer Science, Engineering, or a related field.

Desirable

1. AWS Certified Solutions Architect – Professional.
2. AWS Certified Specialty ideally AWS Certified Machine Learning Specialty.

Reporting to: Head of Solutions Architecture

What we offer

1. Competitive salary and benefits package.
2. The opportunity to work on cutting-edge technology projects with major clients.
3. A supportive, collaborative, and innovative work environment.
4. Continuous professional development opportunities.

How to apply

To apply, please submit your CV, cover letter, and any supporting documents. Applications will be considered on a rolling basis until the position is filled. We are an equal opportunity employer and value diversity at our company.

Please note: All applicants must have the right to work in the applicable country. No sponsorship is available for this position.
